OLC ACCELERATE VIRTUAL CONFERENCE

The CITL has purchased 100 seats for the Online Learning Consortium (OLC) Accelerate Virtual Conference that will be held on November 1st-3rd. This is an excellent opportunity to engage in professional development.

The OLC's 2022 conference emphasizes the most innovative and impactful research and effective online, blended, and digital learning practices. Supporting administrators, designers, and educators alike, this conference offers attendees a comprehensive list of sessions and activities tailored to address the challenges and goals of our entire community. Since there are over 500 sessions, OLC grants all seat holders unlimited access to all sessions for one year.

REGISTER

Under Affiliation, type Tennessee Tech University and then use your TnTech email address. Once registered, you will receive a confirmation email with additional information. You can visit the [OLC website](#) to learn more about the conference and view this year's presenters.

POLL EVERYWHERE INTEGRATION WITH ILEARN

Course instructors can now connect their iLearn course to their Poll Everywhere account by placing a link in a course Content module. This will allow instructors to sync their classlist and send graded activities to their course gradebook. Instructors can still use manual methods for adding participants, such as importing classlists through a .csv file, but this does not allow for integration with the gradebook.
