

Technology Description

Provide a brief, nonenabling, description of your invention. “Nonenabling” means that you provide only enough information to summarize the invention without allowing others to be able to replicate the product.

Markets and Applications

- Provide a brief description of the industries to which you feel your product would be applicable.

Commercial Readiness

Describe the stage at which your invention is ready for commercialization.

Intellectual Property

Provide your IP Provisional Application Number or other applicable intellectual property information.

Benefits

- Briefly summarize how the product would improve society.
